

AMENDMENTS TO THE SPECIFICATION

Please amend the specification as follows:

Page 17, lines 7-12, amend this paragraph as follows:

All Javascript contained on the website, whether in-line in the html page, or in a js file, is examined if to see if it's its use will interfere with communications between the proxy platform and the website. Example of such use includes write, writeln, location of cookies, and document and window functionality. Each use of Javascript is dynamically rewritten on the fly to guarantee that they behave so as to support the user-to-proxy platform-to-website communication.
